

## **STAC Questions**

### **Question 1:**

With regard to Section 2: Program Areas of Interest, 3 Sensors & Control Sciences, A) Process Optimization: Is the area of interest for this round focused on power plant efficiency? The first sentence suggests that development of sensors and control sciences for all basic commodity industries is within the scope. The remainder of the paragraph suggests that the desired emphasis is power plants and power generation.

### **Answer:**

In sensors and controls sciences, power plant efficiency is an area of focus for the process efficiency category, however, process areas in other industry applications are also of interest.
